

MARKETING MIX MODELING

MAXIMIZE YOUR MARKETING IMPACT

WHAT IS IT?

Marketers need to measure and optimize the impact of their marketing plans in order to enhance the return on their spend.

Nielsen Marketing ROI uses statistical models to understand past trends and predict the future effect of marketing tactics on sales, helping companies achieve their business objectives and drive business value. These results and continuous application of marketing ROI offer companies a competitive edge.

HOW IT WORKS?

- Measurement of a wide array of marketing, including traditional (e.g., TV, in-store trade) and non-traditional (e.g., interactive, digital, emerging) elements.
- Store-level model for complete evaluation of media, consumer and in-store promotions, and measuring differences in response across consumer groups.
- Gain perspective on your mix by comparing your marketing strategy to industry norms.
- Consulting services through simulation tools and what-if scenarios in order to improve your marketing plans.

KEY BENEFITS

Unmatched Data Access

Nielsen tracks both media that people are exposed to and what they buy. These proprietary and granular data assets, in combination with third-party data, are utilized in the marketing mix models to gain a strong understanding of the impact of marketing activities on sales.

Best-in-class analytics

With a Nielsen Marketing Mix model, you are getting access to leading statistical approaches and data to most accurately tease out the impact of your marketing investments. We can show the impact of your marketing activities at tactical levels, such as campaign.

Strategic consulting

Nielsen Marketing Mix Modeling consultants are specialized and highly trained in marketing mix modeling, and how to answer your most pressing marketing business questions. Our teams are trusted partners to our clients' teams and provide actionable insights to help you achieve your objectives.

Actionable Insights and Scenario Planning

Nielsen Marketing Planner is the online platform where results of the model can be accessed, and sophisticated forecasting and optimizations can be run to help you determine the best use of your spend.

Global Measurement Expertise

With marketing mix consultants and data assets around the world, we have the ability to provide consistency across region-specific marketing mix recommendations to global marketers.
